Here is history for the background of our lives;  
Here is thinking for the enlarging of our minds;  
Here is fellowship for the warming of our souls.*

Who  
are we?

We are a community of seekers asking questions of life, about its truth and meaning

How do  
we do  
this?

By an individual and collective shared experiences, by means of stories, silence, music, meditation ,prayers and listening to each other.

Having fun,sharing in life's experiences as well as in each other's insights and gaining an understanding of our own awareness; and that which is beyond our current focus.

We are Developing and evolving through our creativity, imagination and intuition.

## ETHOS AND PRACTISE

We are committed by engaging with the truth. Compassion,with a open heart and mind, inspired by wisdom from many sources. Diversity is at the fore front of the time we spend together.

We aim to be both respectful and inclusive .in forming our beliefs and values. What ultimately matters.is our principles of freedom, understanding and conscience.
